

BENEFITS OF ENDURE SR

CEM II/B-V 42.5N, +SR

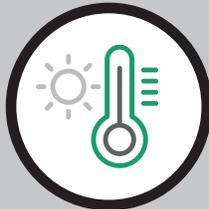

PROPERTIES
Reduced risk of ASR

PROPERTIES
Reduced Alkali & Chloride content

PROPERTIES
Long term strength development continues beyond 28 days

PROPERTIES
Reduced heat of hydration
(Great for mass pours, eg wind turbine base)

PROPERTIES
Improved resistance to carbonation

PROPERTIES
Can be used to DC-4 classification

PROPERTIES
Improved durability against Sulfate & Chloride ingress

BENEFITS
Reduced mixing times

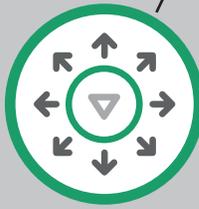

BENEFITS
Improved darker colour

BENEFITS
Improved cohesion

BENEFITS
Reduce water demand for a given consistency

BENEFITS
Improved placing & finish ability

BENEFITS
Improved pumpability

BENEFITS
Reduced embodied CO₂
